

Introducing Geo Webworks Well Spacing Module

Quickly and easily access all Spacing, Spacing Unit, Holding and Commingled orders in the province through a easy to use web-based GIS interface.

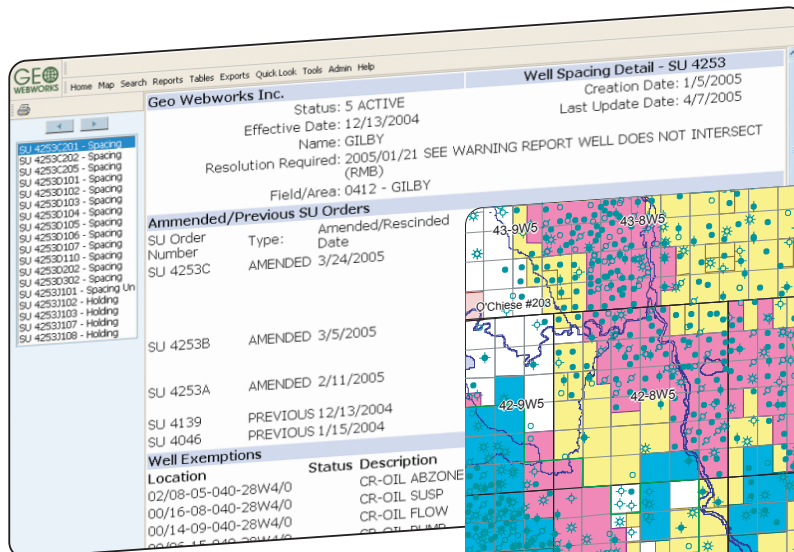

Saves you time digging through microfiche, numerous binders and/or countless pages of complex board orders to learn what applies in given areas.

Stay Current on developments in key areas:

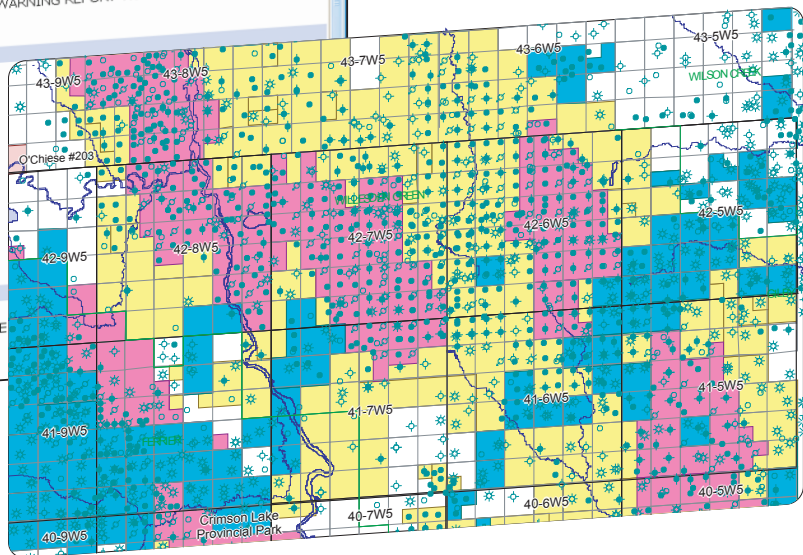

- Do order lookups within seconds
- Develop spacing maps rapidly and easily
- Weekly Updates
- Field, Strike Area and Pool Outlines
- PDFs of all current orders
- Ability to sort and cross reference data

The Geo Webworks Well Spacing Module helps Exploitation Engineering, Land, Completions and Exploration groups work more effectively.
